WHAT IS TECHNION DRIVE?

The Technion DRIVE Accelerator, a 9 month acceleration program for pre-seed and seed projects.

The accelerator is located within the Technion campus and focuses on ICT, Robotics, Big Data, Autonomous Vehicles, Fintech, Augmented Reality, Materials and Digital Health.

The Technion DRIVE Accelerator's main goal is to capitalize on Technion's unique eco-system, innovative capabilities, and stellar human capital (researchers, students and most importantly alumni), by offering seed funding, business mentoring, office space, as well as access to Technion's resources, research facilities, infrastructure and equipment.

It is a manifestation of Technion's vision to position itself not only as a leading research institution, but also as a generator of new ventures.
